

Static class model

1. For no effect on original editor/tester, recreate new series class for game
2. NewGame and NewPacManGameGrid integrate PacMan and Tile Editor base code into one application, and match corresponding characters to show different cells
3. NewMonster and NewPacActor will support different actions for new game.
4. NewPacActor can implement autoplayer with path-finding algorithm.

1. Use PathSearch to find the closest pill path. Every point as a StartNode with x,y value.

2. When NewGame started and autoplayer enabled, NewPacActor will enter autoplayer model and start to search cloest pill node and run.
3. Every move will be filtered by all pill list without visited
